- Highlight: **csa mini fuel station, mini fuel station automatic, automatic diesel gas station**

Product Description

Customized CSA Certified Electric Mini Fuel Station Automatic Diesel C1 6 Feet Hose

Product Description:

The Mini Fuel Station is designed with safety in mind. It features overfill protection and automatic shut-off, ensuring that the fuel dispensing process is safe and risk-free. It also comes with a 6-foot hose length, making it easy to reach fuel tanks and other locations where fuel is needed.

This mini fuel station comes in a classic white color, making it easy to spot and identify. It is also UL listed and CSA certified, which means that it has been tested and approved for use in various settings. The certifications ensure that the Mini Fuel Station meets the highest standards of safety, quality, and performance.

The Mini Fuel Station has a capacity of 1-8CBM, which makes it perfect for small-scale fuel dispensing needs. It is a cost-effective solution that eliminates the need for expensive and bulky fuel stations. The compact design of the mini fuel station makes it easy to store and transport, making it an ideal solution for those who require a mobile fuel station.

Whether you are running a small business, a farm, or a construction site, the Mini Fuel Station is the perfect solution for your fuel dispensing needs. Its safety features, compact design, and certifications make it a reliable and efficient fuel dispenser that you can rely on. Get your mini fuel station today and experience the convenience and ease of use that it offers!

Features:

Product Name: Mini Fuel Station

Power Source: Electric

Flow Rate: 40-60L Per Minute

Safety Features:

Overfill Protection

Automatic Shut-off

Voltage: 220V

Color: White

Introducing the Mini Fuel Station - the perfect solution for a mobile gas station. With electric power source and a flow rate of 40-60L per minute, this mini gas station is equipped with safety features such as overfill protection and automatic shut-off. It operates at a voltage of 220V and comes in a sleek white color.

Technical Parameters:

Capacity	1-8CBM
Voltage	220V
Flow Rate	40-60L Per Minute
Material	Plastic
Power Source	Electric
Color	White
Model	C1
Nozzle Type	Automatic
Certifications	UL Listed, CSA Certified
Application	Gasoline, Diesel, New Energy

Applications:

Construction Sites: The mini fuel station can be used on construction sites to refuel equipment and vehicles. With its compact size, the Fuel Mobile Dispenser can be easily moved around the site, ensuring that all equipment and vehicles remain fueled.

Agricultural Operations: Farmers and ranchers can use the mini fuel station to refuel tractors, combines, and other equipment used in their operations. This makes it easier for farmers to operate their equipment without having to leave the farm to refill fuel.

Remote Locations: For remote locations where fuel stations are not available, the mini fuel station can be used to provide fuel to vehicles and equipment. This is especially useful for oil and gas drilling sites, mining operations, and other remote locations.

Emergency Situations: In emergency situations such as natural disasters, the mini fuel station can be used to provide fuel to emergency vehicles, generators, and other equipment. This ensures that emergency responders have the fuel they need to operate their equipment.

Small Businesses: Small businesses such as landscaping companies, delivery services, and other small transportation businesses can use the mini fuel station to refuel their vehicles. This helps them to save time and money by not having to travel to a fuel station to fill up their tanks.

The Virette mini fuel station is made of plastic and is powered by electricity. It has an automatic nozzle type for easy dispensing and is equipped with safety features such as overfill protection and automatic shut-off. The product is UL Listed and CSA Certified, ensuring that it meets industry safety standards. The mini fuel station is priced between 1000-5000 USD, making it an affordable solution for various needs. The delivery time is around 20 days, ensuring that customers receive their product in a timely manner.

Customization:

Customize your Virette Mini Fuel Station to meet your specific needs. Our mobile fuel station is made in China and is available at a price range of 1000-5000USD with a delivery time of 20 days. The model C1 comes with a voltage of 220V, 6 feet hose length, and a flow rate of 40-60L per minute. Safety features include overfill protection and automatic shut-off.
